

Yamen Joha

Product Engineer · Full-Stack · Next.js & TypeScript

yamn.joha@gmail.com +963 938 044 059 Remote / Damascus, Syria
yamen-website.vercel.app github.com/YamnJoha1 linkedin.com/in/yamn-joha

Product Engineer with 4+ years in frontend engineering, the last 2 shipping complete SaaS products end-to-end — design, frontend, and backend. Specialized in multi-tenant architecture, reusable design systems, and performance-driven UI with Next.js, React, and TypeScript. I take ideas from concept to production using a modern AI-assisted workflow, delivering the output of a small team as a single engineer. Comfortable owning products independently in fast-paced, remote teams.

TECHNICAL SKILLS

Core	Next.js (App Router) · React · TypeScript · JavaScript · HTML5 · CSS3
UI & Styling	Tailwind CSS · shadcn/ui · Radix UI · Framer Motion · Material UI · Three.js
State & Data	TanStack Query · Zustand · Redux · React Hook Form · Zod
Backend	Node.js · Express · PostgreSQL · Supabase (RLS) · REST · GraphQL · NextAuth
Architecture	Multi-tenancy · Row-Level Security · RPC contracts · SSR/SSG · Design systems
Performance	Code splitting · Lazy loading · Memoization · Caching
Tooling	Git · GitHub · Vercel · Vite · Webpack · ESLint · i18n (RTL/EN)

EXPERIENCE

Product / Frontend Engineer — Scripto (Product Studio) May 2025 — Present

- Build and maintain multi-tenant SaaS products with Next.js and TypeScript; one codebase serves many isolated tenants.
- Designed a reusable component library and design-token system that cut delivery time for new features.
- Implemented full Arabic (RTL) / English internationalization using logical CSS properties.
- Refactored frontend architecture for cleaner, more maintainable structure.
- Own features from spec to production in tight startup cycles.

Freelance Full-Stack Developer — Remote / Self-Employed Jan 2024 — Apr 2025

- Delivered production-ready websites and web apps for international clients, end-to-end.
- Translated designs and requirements into polished, accessible interfaces.
- Managed complex forms and client-side data with React Hook Form and TanStack Query.
- Collaborated directly with clients to refine UI behavior and iterate on feedback.

Frontend Developer (React) — Unifi Solutions

May 2023 — Dec 2023

- Contributed to a large-scale multi-tenant SaaS platform for IoT systems.
- Developed and improved shared UI components used across multiple dashboards.
- Applied code splitting and lazy loading to improve dashboard performance.
- Fixed critical bugs within an agile team of designers and backend engineers.

Freelance Web Developer — Remote / Project-Based

Mar 2022 — May 2023

- Built 5+ responsive web applications for small businesses.
- Improved delivery speed with reusable component and layout patterns.
- Gained hands-on experience with real-world projects and remote workflows.

FEATURED PROJECTS

Sello — Multi-Tenant Social-Commerce Platform

[PRIVATE — WALKTHROUGH ON REQUEST]

Next.js · TypeScript · Supabase (RLS) · Tailwind · Zustand · Zod

- Multi-tenant commerce OS: one codebase turns a merchant's social page into a branded storefront on its own subdomain, with a full products/orders dashboard.
- Runtime tenant resolution isolated per tenant with Postgres Row-Level Security; every order flows through a single secure server-side RPC.

Naql — Intercity Bus Booking Marketplace

[PRIVATE — WALKTHROUGH ON REQUEST]

Next.js · TypeScript · Supabase · TanStack Query · Zustand

- Booking flow with a live seat map, per-seat locking (server-issued TTL), and idempotent booking creation to survive double-submits and expired locks.
- Fully Arabic RTL UI with a strict client/server contract; all critical writes go through typed RPCs with a closed error-code set.

Caros — Multi-Tenant Dealership SaaS

[LIVE · CAROS-RHO.VERCEL.APP]

Next.js · TypeScript · Supabase · Tailwind · Leaflet

- Bilingual (AR/EN) white-label storefront and self-service dashboard from a single deployment.
- Advanced inventory filtering, map-based browsing, dynamic per-tenant theming, WhatsApp lead capture.

Full-Stack E-commerce Platform

[LIVE · E-COMMERCE-TWO-MU-73.VERCEL.APP]

Next.js · React Native · NestJS · PostgreSQL · Prisma · GraphQL

- Full-stack platform across web and mobile with a scalable NestJS + PostgreSQL backend.
- Reusable cart/product architecture, Stripe integration, GraphQL APIs, built for scale.
